GLÄNTA

Product Sheet

Trädets branch structure consists of three different heights with two different grip thicknesses to suit all individuals. Here, various exercises such as chin-ups and pull-ups are given, but the shape and distances also invite using it for arm walks around the branch structure.

Article number: 267156

Designer: Jan Loftén

Material: Stainless steel

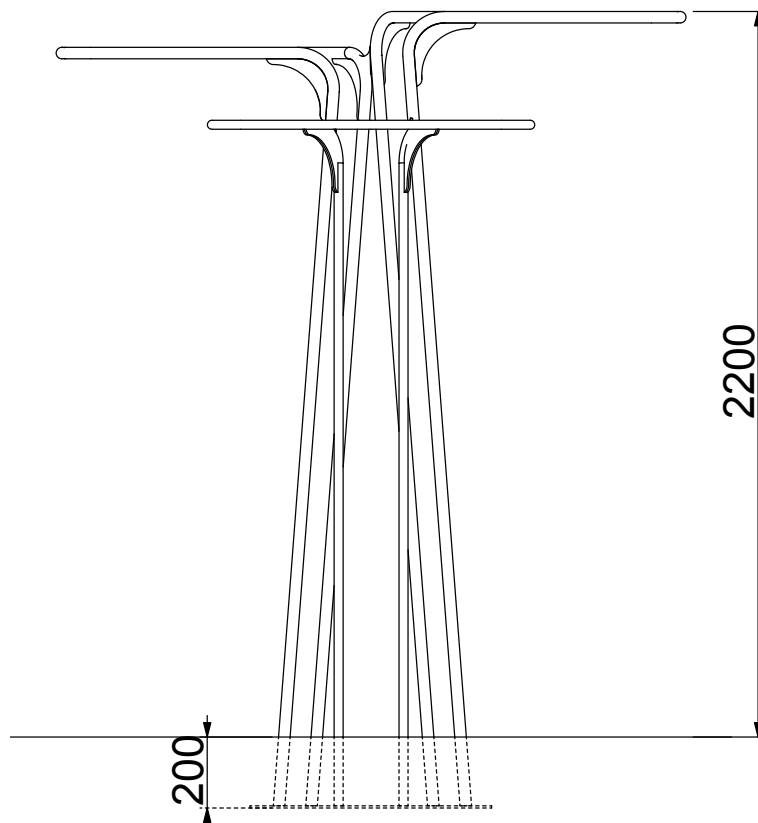

Country of manufacture: Sweden

Environmental labeling: See website

The equipment complies with the standard for permanently installed outdoor fitness equipment SS-EN 16630:2015.
